

Action Research Project Story Template

This **Action Research Project Story Template** is intended as a guide to capture, analyse and share their project processes, successes, challenges, outcomes and learnings. The Project Story can be used as a tool for reflection, evaluation or 'stocktaking' where a project is up to. This includes: sharing with your community, sharing as part of reporting to DSS, and sharing with ANROWS. The Project Story is not limited to text, and may include photographs, audio, or other multimedia. There may be aspects of this Template which are not relevant or useful for your work; and modifications can be made to the questions so that you can best reflect your Project Story. Documenting and sharing the action research of CALD PAR projects in this way, will provide an **important contribution to the growing evidence-base** around best practices for preventing, reducing, and responding to violence against women and their children.

CALD PAR Project Title

The storyteller

CALD PAR Project Officer's name and members of your project's community reference group.

What is the story about?

Provide a short background. Say what your Action Research focus is, both topic and process.
